

Diamond Springs / El Dorado Fire Protection District Detachment of
the Shingle Springs Rancheria
LAFCO Project No. 2010-05

Proposal to detach one parcel, APN 319-100-37 (159.25 acres), from the Diamond Springs / El Dorado Fire Protection District (DSP). DSP initiated the detachment of the Shingle Springs Rancheria because services that have historically been provided by DSP without compensation are now provided by the El Dorado County Fire Protection District under a compensated contract with the Tribal Government; DSP is no longer requested to provide these services on a regular basis. The subject property is located in the Shingle Springs area, on the north side of US Highway 50, approximately 1,000 feet north of the Red Hawk Parkway exit.
