Notes: This bill is sponsored by CALAFCO. It makes several changes to CKH, including elimination of private railroads from the definition of landowner, allows LAFCo to process islands created by county boundary changes after 2000 under the island annexation provisions, and clarifies that LAFCos are authorized to establish a schedule of fees for applications as well as establish a deposit schedule and charge "service charges" against that deposit. The bill also makes non-substantive language clarifications to 56375.

We have agreed to remove the railroad language on 29 May since the RR have raised some valid concerns related to our approach. Both CALAFCO and the railroads are in consensus on the intent of the language and have agreed to work out some language this summer and co sponsor a bill next session.

Summary: Existing law provides for the existence, in each county, of a local agency formation commission (LAFCO), an administrative body vested with the authority and responsibility to control the process of municipal expansion by overseeing local agency boundary changes, including the incorporation, annexation, and reorganization of cities and special districts. The LAFCO for each county reviews and approves or disapproves proposed local government changes of organization; and, under specified circumstances, the determinations of the LAFCO are subject to voter approval through the circulation of a signature petition and a subsequent ballot measure. This bill would impose on a committee formed to support or oppose a LAFCO proposal, as defined, requirements regarding the filing of campaign statements. The bill would require the committee to file monthly campaign statements from the time circulation of a petition begins until a measure is placed on the ballot or the committee is terminated. After a LAFCO proposal measure is placed on the ballot, the bill would require a committee formed to support or oppose the proposal to file those campaign statements required of other committees formed to support or oppose ballot measures under the Political Reform Act of 1974. This bill contains other related provisions and other existing laws.

Summary: Existing law, the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 defines "change of organization" to mean, among other things, a district formation, a consolidation of cities or special districts, or a merger or establishment of a subsidiary district. This bill would include within the definition of "change of organization" a proposal for the exercise of new or different functions or classes of services, or the divestiture of the power to provide particular functions or classes of services, within all or part of the jurisdictional boundaries of a special district. Summary: The Cortese-Knox-Hertzberg Act of 2000 requires the local agency formation commission in each county to review and approve or disapprove proposals for changes of organization or reorganization of cities and districts within the county. The legislative body of the affected local agency is authorized to adopt, by resolution, a proposal for a change of organization or a reorganization. At least 20 days before the adoption of the resolution of application for organization or reorganization, the legislative body is authorized to give mailed notice of its intention to do so to the commission and to each interested agency and each subject agency. All provisions in the act governing the time within which an official or the commission is to act are required to be deemed directory, rather than mandatory, except for notice requirements and the specified requirements for conducting a hearing in relation to an application to initiate proceedings. This bill would instead authorize the legislative body to give mailed notice of its intention to adopt a resolution of application at least 21 days before the adoption of the resolution to the commission and to each interested agency and each subject agency. The bill also would make a

conforming addition to the exceptions to the requirement that the time within which an official or the commission is to act is to be deemed directory, rather than mandatory, and would make other conforming changes. This bill contains other related provisions and other existing laws.

Summary: The Vehicle License Fee (VLF) Law establishes, in lieu of any ad valorem property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state. Under existing law, the Controller is required to allocate VLF revenues in the Motor Vehicle License Fee Account in a specified order to, among others, each city that was incorporated from an unincorporated territory after August 5, 2004, but before July 1, 2009. Existing law also requires cities that were incorporated before August 5, 2004, be allocated additional VLF revenues in an amount determined pursuant to a specified formula. For purposes of this formula, existing law specifies that the population of a city that is incorporated before August 5, 2004, is that city's actual population, as defined, residing in areas annexed after August 5, 2004, but before July 1, 2009. This bill would delete the requirement that a city be incorporated before July 1, 2009, in order to be allocated VLF revenues. This bill would specify, for purposes of this formula used to determine additional VLF revenues for cities that were incorporated before August 5, 2004, that the city's actual population is the population residing in areas annexed after August 5, 2004. This bill contains other related provisions and other existing laws.

Summary: Existing law requires designated transportation planning agencies to prepare and adopt a regional transportation plan that includes a policy element, an action element, and a financial element.

The plan is required to be directed at achieving a coordinated and balanced regional transportation plan. Each transportation agency with a population that exceeds 200,000 persons is authorized to prepare at least one alternative planning scenario, as specified. This bill would require a transportation planning agency with a population exceeding 200,000 persons (A) to prepare an initial planning scenario, as specified, and an alternative planning scenario, as specified, (B) to adopt and publish procedures governing the preparation and adoption of the initial planning scenario and the alternative planning scenario, as specified, and (C) to submit, at least 90 days prior to circulation of the draft regional transportation plan, the initial planning scenario and the alternative planning scenario and accompanying report to the State Air Resources Board, as specified. These additional duties would impose a state-mandated local program. The State Air Resources Board would be required to hold a public hearing and issue a written report determining whether either the initial planning scenario or the alternative planning scenario will inhibit the state from achieving its goals under the California Global Warming Solutions Act of 2006. A city or county would be authorized to create one or more transportation infill areas, as specified. This bill contains other related provisions and other existing laws.

Position: Watch
Priority: 1

Notes: This bill was amended on 9 June 2008 as a competing bill to SB 375. It adds to the requirements of Regional Transportation Plans. The ammended bill contains some of the same concepts as 375 but eliminates much of the language and provisions related to ag, open space and habitat preservation, and focuses instead on regional planning and reducing the "land use-transportation carbon footprint." It does require the plan to consider the SOIs and MSRs adopted by LAFCo. Also, this would only apply to a transportation agency with a population exceeding 200,000. We are currently doing additional analysis.

Summary: Existing law requires certain transportation planning activities by the Department of Transportation and by designated regional transportation planning agencies, including development of a regional transportation plan. Certain of these agencies are designated under federal law as metropolitan planning organizations. Existing law authorizes the California Transportation Commission, in cooperation with the regional agencies, to prescribe study areas for analysis and evaluation. This bill would require the commission to maintain guidelines, as specified, for travel demand models used in the development of regional transportation plans by metropolitan planning organizations. The bill would require the commission to consult with various agencies in this regard, and to form an advisory committee and to hold workshops before amending the guidelines. This bill contains other related provisions and other existing laws.

Notes: The CALAFCO Board voted to support SB 375 at its 8 August 2008 meeting. This support is predicated on the inclusion of LAFCo boundaries and spheres in the language of the Sustainable Communities Strategy. That language was included in the legislative mock-up submitted to Legislative Counsel. However, the significantly amended version of SB 375 is still not in print despite the fact that the bill is quickly moving through the legislature.

Summary: Existing law, the Irrigation District Law, with certain exceptions, requires a director on the board of an irrigation district that provides electricity for residents of the district to be a voter of the district and a resident of the division that the director represents at the time of his or her nomination or appointment and during his or her entire term . Existing law authorizes an irrigation district to sell, dispose of, and distribute electricity for use outside of the district's boundaries . This bill would prohibit certain irrigation districts from discriminating, as defined, against electrical ratepayers residing outside the district boundaries. The bill would also prohibit certain irrigation districts from discriminating, as defined, against electrical ratepayers in favor of water ratepayers. These prohibitions would be applicable to an irrigation district that (1) has more than 50,000 service connections for electrical service, and (2) has a majority of the district's service connections for electrical service outside the district boundaries. Summary: The Subdivision Map Act establishes a statewide regulatory framework for controlling the subdividing of land. The act generally requires a subdivider to submit, and have approved by the city, county, or city and county in which the land is situated, a tentative map. The act requires the legislative body of a city or county or the advisory agency, to the extent that it is authorized by local ordinance to approve, conditionally approve, or disapprove the tentative map, to include as a condition in any tentative

map that includes a subdivision a requirement that a sufficient water supply be available. The act authorizes the legislative body to request written verification of sufficient water supply, and, when the written verification relies on projected water supplies that are not currently available to the public water system to provide a sufficient water supply to the subdivision, requires that the written verification as to those projected water supplies be based on prescribed elements. This bill would add to those written verification elements the status of specified groundwater treatment or remediation plans or other water management options. Summary: The California Environmental Quality Act (CEQA) declares legislative intent that all agencies of state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, give consideration to preventing environmental damage when regulating those activities. CEQA requires all lead agencies, as defined, to prepare an environmental impact report for any project which may have a significant effect on the environment. Existing law requires all project applicants and public agencies subject to CEQA to pay the filing fee for each proposed project, unless the project has no effect on fish or wildlife, the project is being undertaken by the department, or the project costs are payable to the department from specified sources. Existing law requires the Department of Fish and Game to impose and collect these filing fees, in prescribed amounts, to defray the costs of managing and protecting fish and wildlife trust resources. This bill would revise those exemptions from the payment of the filing fee to instead exempt a project that the lead agency has determined will have no effect on fish and wildlife, and also exempt from the payment of filing fee a project being undertaken by a public agency or the department.

Summary: Existing law authorizes various public entities, including special districts, to provide water service and regulate groundwater. This bill would enact the Santa Ynez Valley Water District Act. The bill would establish the Santa Ynez Valley Water District in Santa Barbara County. The bill would prescribe the composition of the board of directors of the district. The bill would specify the district's boundaries, powers, and purposes. The district would succeed to the powers, rights, duties, responsibilities, obligations, liabilities, and jurisdiction of Improvement District No. 1 within the Santa Ynez River Water

Conservation District, which entity would cease to exist, except as otherwise specified. This bill contains other related provisions and other existing laws.

Summary: Existing law, the Planning and Zoning Law, requires that a State Environmental Goals and Policy report be prepared and regularly reviewed and revised. Under existing law, the report's purpose is to record approved goals, policies, and decisions of state government related to statewide growth and development and the preservation of environmental quality. This bill would create the California Blueprint Implementation Council, consisting of designated members, that would, in part, facilitate implementation of regional blueprint projects. The bill would also require the council to report to the Legislature on state planning matters and specified regional performance measures. It would specify that the council would perform these functions and duties only to the extent that funding is available for that purpose, require the council to seek and authorize it to receive funding from state and nonstate resources, and require the Governor's Office of Planning and Research to provide administrative assistance and support staff to the council.

Summary: Under existing law, the State Water Resources Control Board and the California regional water quality control boards prescribe waste discharge requirements for publicly owned treatment works and other dischargers in accordance with the Porter-Cologne Water Quality Control Act (state act) and the federal Clean Water Act. Existing law, commencing the year in which funding is provided, requires the state board to develop a uniform overflow event report form to be used by the system owner or operator to report sanitary sewer system overflows. Existing law, commencing the year in which funding is provided, requires a database on sanitary sewer system overflows and spills to be developed and made available to the public. This bill would require the state board, commencing January 1, 2011, to issue annually a letter grade, as specified, for each separate sanitary sewer system, sewage treatment plant, combined sewer system, and combined sewer system treatment plant in the state that is subject to waste discharge requirements in accordance with letter grading methodologies that the state board would be required to establish. The state board would be required, by January 1, 2010, to establish a methodology for measuring a sewage treatment plant's peaking factor for specified flows, to designate a prescribed peaking factor or factors, and to establish, as necessary, monitoring and reporting requirements to measure peaking factors. This bill contains other related provisions and other existing laws.

Summary: The Disaster Preparedness and Flood Prevention Bond Act of 2006, which was enacted by the Legislature and approved by the voters at the November 7, 2006, statewide general election, authorizes the expenditure of \$4,090,000,000 in bond funds for specified disaster preparedness and flood prevention projects. Those projects include projects for the evaluation, repair, rehabilitation, reconstruction, or replacement of levees, weirs, bypasses, and facilities of the State Plan of Flood Control; improving or adding facilities to the State Plan of Flood Control to increase levels of flood prevention for urban areas; reducing the risk of levee failure in the delta; and protection, creation, and enhancement of flood protection corridors and bypasses through specified actions. The bill would require the Department of Water Resources (department), when evaluating levees and facilities pursuant to a specified project, to include an evaluation of the risk of the levees and facilities failing due to a seismic event. In implementing the projects for the protection, creation, and enhancement of flood protection corridors and bypasses through specified actions, the bill would require the department to give priority for projects and expenditures that result in a systemwide reduction of flood risks and for projects that address the needs of disadvantaged communities, as the bill would define that term. A grant program that would provide bond funds to rehabilitate, reconstruct, replace, or improve existing flood levees, or construct new flood levees, or other management facilities that are a part of the State Plan of Flood Control would be required to comply with specified requirements. This bill contains other related provisions and other existing laws.

Summary: The California Water District Law provides for the establishment of water districts, and grants a district the power to acquire, plan, construct, maintain, improve, operate, and keep in repair the necessary works for the production, storage, transmission, and distribution of water for irrigation, domestic, industrial, and municipal purposes. This bill would dissolve the Hot Spring Valley Irrigation District in the County of Modoc, and establish the Hot Spring Valley Water District in that county, which would succeed to, and be vested with, all the powers, duties, responsibilities, obligations, liabilities, and jurisdiction of the former Hot Spring Valley Irrigation District. The bill would declare the Hot Spring Valley Water District to be, and require that the district be deemed, a California water district. This bill contains other related provisions and other existing laws.

Summary: The Ralph M. Brown Act requires that all meetings of a legislative body of a local agency be open and public and all persons be permitted to attend unless a closed session is authorized. The act prohibits any use of direct communication, personal intermediaries, or technological devices that is employed by a majority of the members of the legislative body to develop a collective concurrence as to action to be taken on an item, with an exception for an authorized teleconference. An appellate court in *Wolfe v. City of Fremont* (2006) 144 Cal.App.4th 533 held that a violation of this prohibition occurs only if a series of meetings by members of a body results in a collective concurrence. This bill would instead prohibit a majority of members of a legislative body of a local agency from using, outside a meeting authorized by the act, a series of communications of any kind, directly or through intermediaries, to discuss, deliberate, or take action on any item of business that is within the subject matter jurisdiction of the legislative body. It also would state the Legislature's declaration that it disapproves the holding of the court in the case named above to the extent it construes the prohibition on serial meetings and would state its intention that the changes made by this bill supersede that holding. It would also provide that the changes made by this bill shall not be construed as preventing an employee or official of a local agency, from engaging in separate conversations or communications, outside of a meeting authorized by the Ralph M. Brown Act, with members of a legislative body in order to answer questions or provide information regarding a matter that is within the subject matter jurisdiction of the local agency, if that person does not communicate to members of the legislative body the comments or position of any other member or members of the body. This bill contains other related provisions and other existing laws.
