

EL DORADO LAFCO

LOCAL AGENCY FORMATION COMMISSION

AGENDA OF FEBRUARY 28, 2018

REGULAR MEETING

TO: Shiva Frentzen, Chair, and
Members of the El Dorado County Local Agency Formation
Commission

FROM: José C. Henríquez, Executive Officer

PREPARED BY: Erica Sanchez, Assistant Executive Officer

AGENDA ITEM #4D: REQUEST FOR TIME EXTENSION – PORTER ANNEXATION
TO THE EL DORADO IRRIGATION DISTRICT

LAFCO Project No. 2013-02

PROPONENT: Gregory Porter

AGENT: David Crosariol, CTA Engineering and Land Surveying

RECOMMENDATION

Staff recommends that the Commission consider a fourth one-year extension request for the Porter Annexation into the El Dorado Irrigation District (EID), to give the project proponent additional time to comply with the Commission's conditions of approval. The current deadline expires March 26, 2018; the time extension would be effective until March 26, 2019.

REASON FOR RECOMMENDED ACTION

Per Government Code §57001, if a certificate of completion is not recorded for a project within one year of Commission approval, the project shall be terminated unless the Commission grants an extension. The extension may be for any period deemed reasonable to the Commission for completion of necessary prerequisite actions by any party. The certificate of completion cannot be recorded until all conditions of approval have been met.

BACKGROUND

The Commission conditionally approved the Porter Annexation to EID on March 26, 2014, with a standard one-year deadline to complete all required conditions. The final conditions include authorization from the United States Bureau of Reclamation (USBR)

to approve the inclusion request for the project area, and payment of State Board of Equalization (SBE) fees, which cannot be collected until after USBR inclusion approval is received. At the request of the applicant, the Commission has granted three previous one-year extensions for the project in 2015, 2016 and 2017, to allow additional time to comply with the conditions of approval. The current extension is scheduled to expire on March 26, 2018.

Although the project is within EID's Western/Eastern Service Area which usually doesn't require USBR review, the Porter project will utilize water from EID's Bass Lake water storage tanks, which will require USBR inclusion approval to verify that water resources are available from Folsom Lake for this project. Therefore, the inclusion request packet was sent to USBR shortly after EID Board approval of the annexation in January 2016. USBR approval typically takes 12-24 months to receive, and can potentially take even longer.

The reported status of the USBR inclusion request is that the project is currently under review at the Folsom USBR office, and will then be sent to the regional USBR office in Sacramento for final approval. USBR staff has given a tentative timeframe for final approval by mid-February; however, given the uncertainty of an exact approval date, the applicant is requesting the Commission approve a fourth one-year extension to ensure all conditions can be completed by the March 26, 2018 deadline.

If the Commission denies the extension request and the final conditions are not completed within this timeframe, the annexation will be terminated. The applicant would be eligible to reapply for annexation one year after this date; however, the process would start over from the beginning.
